Health check by a school doctor

Return to University

Permitted by a school doctor to return University

Examples: Symptoms of suspected COVID-19 infection

●Fever

*Approximately 37.5°C or higher, or 1°C higher than your normal body temperature

*Normal body temperature varies by person. Measure your body temperature regularly and know your normal temperature.

●Cough

●Breathlessness

(Need to be cautious of the possibility of concurrent pneumonia)

●Sore throat

(Excluding cases with known causes such as hay fever or allergies)

●Smell and taste disorder

(Cannot smell or taste even though you don't have nasal congestion)

●Digestive disorders

(Loss of appetite, stomachache, diarrhea, and so on)

●Strong sluggishness of whole body

●Muscle and joint pains of whole body

*The COVID-19 symptoms vary by person, and even though you don't have fever, you could be infected. Please be cautious about the changes of your health condition

*In some cases, the patient may be completely asymptomatic, without even a fever..

If you are not sure about your condition, consult with Kyutech's University Health Center of each campus.
